## RESULTS OF OPERATIONS

The Fund's net assets increased by \$38.6 million to \$246.7 million from March 31, 2023 to September 30, 2023. The Fund had net sales of \$38.6 million during the period. The portfolio's performance increased assets by \$4.8 million. The Fund paid distributions totalling \$4.8 million. Series A shares returned 2.0% after fees and expenses for the six-month period ended September 30, 2023.

The performance of the Fund's other Series is substantially similar to that of Series A shares, except for differences in the structure of fees and expenses. For the returns of the Fund's other Series, please refer to the "Past Performance" section.

The following commentary pertains to the results of operations of the CI Money Market Fund (the Underlying Fund).

During the period, economic data, for the most part, was meeting consensus expectations. However, the market response has been slightly at odds with that data. Inflation was moderating, manufacturing modestly contracted, labour markets began to loosen, and consumers turned more cautious. Yet, developed-market yield curves continued to steepen and credit spreads (the difference in yield between securities of similar maturities but differing credit quality) remained at the tighter end of their recent range.

In June 2023, the Bank of Canada (BoC) increased short-term interest rates by 25 basis points (bps), with another 25-bp raise in July. The BoC held interest rates steady at 5.00% at its September meeting.

Overweight exposures to both government and corporate short-term securities, with historically attractive yields, translated to a higher overall yield for the Fund. A holding in a floating-rate bond issued by The Toronto-Dominion Bank (Jan. 31, 2025) was the largest individual contributor to the Fund's performance as the BoC increased its overnight rate from 4.50% to 5.00%.

The Fund's cash position was maintained to ensure the liquidity needs of the Fund are met. As cash yields were slightly lower than security yields, this positioning detracted from the Fund's performance.

Increases and decreases to the Fund's positions are made primarily as a result of cash management activities to address flows into and out of the Fund when they occur. Active trading is not common as the securities are short term in nature and of high quality and, therefore, held to maturity absent material outflows from the Fund. This limits unnecessary turnover and transaction costs.

## RECENT DEVELOPMENTS

Economic conditions continue to unfold as expected. While labour markets and consumer spending remain stronger than expected, economic data continues to weaken as higher interest rates take hold. Lending conditions are tightening, and higher interest rates are starting to drive delinquencies and bankruptcies higher.

Our interpretation of the BoC's most recent statement was that it remains uncomfortable with the persistence of inflation while acknowledging the downtick in economic activity. Interest rates are likely to stay higher for longer to tame inflation, which poses a risk of recession over the next six months. We believe the BoC is likely to remain on hold regarding raising interest rates as the lagged impact of higher borrowing costs feed into consumer behaviour. We will look for further declines in consumer discretionary spending, job gains and wage pressures.

### **Series name change**

Effective on or around July 28, 2023, Series X were redesignated as Series A.
