RESULTS OF OPERATIONS

The Fund's net assets decreased by \$108.1 million to \$1,380.8 million from March 31, 2023 to September 30, 2023. The Fund had net redemptions of \$48.7 million during the period. The portfolio's performance increased assets by \$1.3 million. The Fund paid distributions totalling \$60.7 million. Series A units returned -0.2% after fees and expenses for the six-month period ended September 30, 2023. Over the same time period, the Fund's benchmark returned -1.5%. The benchmark is a combination of the ICE BofA U.S. High Yield Total Return Index (USD) - 40%, the MSCI ACWI Global High Dividend Yield Total Return Index - 20%, the MSCI ACWI Infrastructure Total Return Index - 20% and the MSCI World Real Estate Total Return Index - 20% (the Benchmark or the Index).

The performance of the Fund's other Series is substantially similar to that of Series A units, except for differences in the structure of fees and expenses. For the returns of the Fund's other Series, please refer to the "Past Performance" section.

The U.S. Federal Reserve Board and Bank of Canada surprised the market with two to three more interest rates hikes than had been anticipated a year ago. The persistent rise in government bond yields throughout the period pushed interest-rate-sensitive equities lower. Security selection allowed for differentiated returns above the broad market indexes, but like 2021, market leadership narrowed and with outsized contribution from seven information technology sector stocks.

The Fund outperformed its benchmark for the period. Security selection within infrastructure equities and high-yield bonds contributed to the Fund's performance, as did an overweight allocation to high-yield bonds. A lower duration (interest rate sensitivity) than the benchmark also contributed to the Fund's performance. A holding in Cheniere Energy Inc. was a notable individual contributor to the Fund's performance after the company reported solid year-to-date operating results and strategic direction, and global supply shocks supported liquefied natural gas prices. A holding in American Homes 4 Rent also contributed to the Fund's performance, despite negative sentiment toward the real estate market. The company's stock benefited from higher mortgage costs, which raised the value proposition of single-family home rentals.

Security selection in real estate equities detracted from the Fund's performance. A holding in Alexandria Real Estate Equities Inc. detracted from the Fund's performance as rent growth assumptions were questioned as supply came online. The company's stock also declined as more interest-rate-sensitive parts of the equity market moved lower as interest rates rose. A holding in Transurban Group detracted from the Fund's performance after a competition bureau announced a ruling that may limit the company's growth avenues.

We added to the Fund a new BBB-rated bond, Paramount Global 4.375% due 2043, as interest rates rose. We believe a stagnant stock price should be the catalyst for credit improvement. We also purchased a holding in Auckland International Airport Ltd. as the City of Auckland sold down its stake. Tourism fundamentals are favourable, and the dividend yield should grow in the years ahead. We added a new holding in Getlink SE, which owns and operates the Eurotunnel and other transportation and freight networks.

We sold the Fund positions in higher-priced bonds, including the Canadian-dollar-denominated bonds of CES Energy Solutions Corp. (6.375% due 2024), due to relative value concerns. The proceeds were redeployed into higher-yield, lower-priced and longer-duration opportunities. The Fund position in Brookfield Asset Management Inc. was also sold after the company's stock rebounded strongly in August 2023. The company's private markets fundraising has been impressive even as monetization has slowed.

RECENT DEVELOPMENTS

Within fixed income, the combination of short duration and high carry has made the high-yield bond segment, with leveraged loans, the best-performing sector, even as defaults have risen as expected. Broad equity market returns contradict underlying economic data that show inflation softening, even as employment remains robust. Higher interest rates are expected to continue to impact consumers, mortgage holders and corporate borrowers with greater effect as we move in to 2024.

Various surveys point to an increasing expectation that global inflation can be tamed without a significant contraction in world economic growth. This would be the so-called economic "soft landing," even if it means (in our interpretation) one or two quarters of slightly negative year-over-year growth. This would keep yields higher for longer, but probably also broadly support valuations on riskier assets.

CI Diversified Yield Fund

Management Report of Fund Performance for the period/year ended September 30, 2023

The interest-rate-sensitive parts of the equity market (notably real estate and infrastructure) have struggled to stay in positive territory and maintain investor interest with information technology sector stocks hogging the spotlight. We are sticking with long-lived, cash-flowing businesses that can support high dividends and dividend growth. Lower government bond yields, should they materialize in 2024, should be positive for the Fund.

(1) This information is derived from the Fund's semi-annual and annual financial statements.

(2) Management expense ratio is calculated based on expenses charged to the Fund (excluding commissions and other portfolio transaction costs) and is expressed as an annualized percentage of daily average net assets for the period/year, including the Fund's proportionate share of any underlying fund(s) expenses, if applicable. The Effective HST tax rate is calculated using the attribution percentage for each province based on unitholder residency and can be different from 13%.

(3) The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average net assets during the period/year, including the Fund's proportionate share of such expenses of any underlying fund(s), if applicable.

(4) The Fund's portfolio turnover rate indicates how actively the Fund's portfolio advisor manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the fiscal period/year. The higher a Fund's portfolio turnover rate in a period/year, the greater the trading costs payable by the Fund in the period/year, and the greater the chance of an investor receiving taxable capital gains in the period/year. There is not necessarily a relationship between a higher turnover rate and the performance of a Fund. Portfolio turnover rate is calculated by dividing the lesser of the cost of purchases and the proceeds of sales of portfolio securities for the period/year, and excluding cash and short-term investments maturing in less than one year, and before assets acquired from a merger, if applicable, by the average of the monthly fair value of investments during the period/year.

(5) This information is provided for the period(s)/year(s) ended September 30, 2023 and March 31.
