### **RESULTS OF OPERATIONS**

The Fund's net assets decreased by \$334.4 million to \$8,567.6 million from March 31, 2023 to September 30, 2023. The Fund had net redemptions of \$108.2 million during the period. The portfolio's performance decreased assets by \$47.6 million. The Fund paid distributions totalling \$178.6 million. Series A units returned -1.2% after fees and expenses for the six-month period ended September 30, 2023. Over the same time period, the Fund's benchmark returned 0.7%. The benchmark is a combination of the MSCI ACWI Total Return Index - 60%, the J.P. Morgan Global Government Bond Total Return Index - 25% and the ICE BofA U.S. High Yield Total Return Index (USD) - 15% (the Benchmark or the Index).

The performance of the Fund's other Series is substantially similar to that of Series A units, except for differences in the structure of fees and expenses. For the returns of the Fund's other Series, please refer to the "Past Performance" section.

During the period, the anticipated economic recovery in China failed to gain momentum. The period was characterized by higher U.S. interest rates, a strong U.S. dollar and a slowly declining inflation rate. Investors continued to show enthusiasm for the generative artificial intelligence (AI) theme.

The Fund underperformed its benchmark for the period. Stock selection detracted from the Fund's performance, as did exposure to U.S. Treasuries as yields shifted in September 2023. Underweight exposures to financials, information technology and consumer discretionary as well as stock selection within communication services detracted from fund performance. Notable individual detractors from the Fund's performance included a holding in AIA Group Ltd. Its stock was weighed down by strong growth in lower-margin long-term savings in Hong Kong. Also, with the company's China investment portfolio having over 90% of its fixed-income assets in Chinese, investors were concerned about the asset quality of the company's mainland China investments. Other individual detractors from the Fund's performance were positions in AT&T Inc., MasTec Inc., U.S. Treasury 4.0%, Nov. 15, 2052 and U.S. Treasury 4.13%, Nov. 15, 2032.

An underweight allocation to fixed-income securities contributed to the Fund's performance, as did an overweight cash allocation. An underweight exposure to the health care sector also contributed to the Fund's performance. Top individual contributors to the Fund's performance included a holding in Eli Lilly and Co. Its stock rose after the company raised its 2023 forecast amid optimism regarding its type 2 diabetes drug, Mounjaro, and anti-obesity drug, Tirzepatide. The Fund's information technology sector and related holdings, including NVIDIA Corp., Alphabet Inc., Li Auto Inc. and Advanced Micro Devices Inc., contributed to performance as the sector outperformed. The Al-induced rebound created an interesting dilemma as investors flocked into this growth theme in the absence of other strong investment themes, driving valuations well beyond historical averages.

We added a new position in CI Private Markets Growth Fund to the Fund. A new holding in Mitsubishi UFJ Financial Group Inc. was added because the company is well positioned to take advantage of the expected end to Japan's deflationary period. Net interest margin expansion, low and stable credit cost from steady retail business, and solid wholesale banking all add to the attractiveness of this investment. Existing holdings in Sony Group Corp., Sempra Energy, Samsung Electronics Co. Ltd. and ASML Holding NV were increased.

A position in Li Auto Inc. was eliminated from the Fund. The company's unique position in premium sport utility vehicles in China and good traction in premium extended-range electrical vehicles helped to support its turnaround in fiscal-year 2023. We took profit on the position. We initiated and subsequently eliminated holdings in Allkem Ltd., Carnival Corp. 5.75%, Dec. 1, 2027, Cleveland-cliffs Inc. 6.75%, Apr. 15, 2030, The Goldman Sachs Group Inc. 7.5% preferred shares, Noble Finance II LLC 8.0%, Apr. 15, 2030, Star Parent Inc. 9.0%, Oct. 1, 2030, U.S. Treasury 3.75%, Apr. 15, 2026 and a variable rate bond issued by IAMGOLD Corp. (May 15, 2028).

#### **RECENT DEVELOPMENTS**

Higher-for-longer U.S. interest rates continue to be a major challenge for equities. U.S. interest rates are expected to peak soon, but the hurdle to cut interest rates are high and lower short-term interest rates may only materialize during the second half of 2024. Longer-term interest rates will likely turn much sooner, as the economic slowdown in the United States cools inflationary pressures.

More signs are emerging that the U.S. economy is heading for a softer period ahead. It remains an open question what the softer landing will look like. Credit data, recent housing starts data, a still-weak manufacturing sector and slightly softer consumer data all suggest an increased risk of recession. A deeper or longer recession might also question the pace of expected turnaround in earnings growth for 2024.

Management Report of Fund Performance for the period/year ended September 30, 2023

We continue to position the Fund for a mild, but longer slowdown in the U.S. economy, with Europe remaining in a state of stagflation. Although Japan's growth had been upgraded of late, the sustainability of strong economic growth in Japan remains uncertain. We are looking to increase the Fund's underweight allocation to equities and will maintain a neutral positioning for the Fund in investment-grade and government bonds, and an underweight exposure to high-yield bonds. We are also planning to increase the Fund's allocation to private funds and increase its cash position.

(1) This information is derived from the Fund's semi-annual and annual financial statements.

(2) Management expense ratio is calculated based on expenses charged to the Fund (excluding commissions and other portfolio transaction costs) and is expressed as an annualized percentage of daily average net assets for the period/year, including the Fund's proportionate share of any underlying fund(s) expenses, if applicable. The Effective HST tax rate is calculated using the attribution percentage for each province based on unitholder residency and can be different from 13%.

(3) The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average net assets during the period/year, including the Fund's proportionate share of such expenses of any underlying fund(s), if applicable.

(4) The Fund's portfolio turnover rate indicates how actively the Fund's portfolio advisor manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the fiscal period/year. The higher a Fund's portfolio turnover rate in a period/year, the greater the trading costs payable by the Fund in the period/year, and the greater the chance of an investor receiving taxable capital gains in the period/year. There is not necessarily a relationship between a higher turnover rate and the performance of a Fund. Portfolio turnover rate is calculated by dividing the lesser of the cost of purchases and the portfolio soft for bortfolio excirities for the period/year, and excluding cash and short-term investments maturing in less than one year, and before assets acquired from a merger, if applicable, by the average of the monthly fair value of investments during the period/year.

(5) This information is provided for the period(s)/year(s) ended September 30, 2023 and March 31.
