RESULTS OF OPERATIONS

The Fund's net assets decreased by \$14.1 million to \$475.4 million from March 31, 2023 to September 30, 2023. The Fund had net redemptions of \$40.8 million during the period. The portfolio's performance increased assets by \$27.0 million. The Fund paid distributions totalling \$0.3 million. Series A shares returned 5.4% after fees and expenses for the six-month period ended September 30, 2023. Over the same time period, the Fund's benchmark returned 5.7%. The benchmark is the S&P 500 Total Return Index (the Benchmark or the Index).

The performance of the Fund's other Series is substantially similar to that of Series A shares, except for differences in the structure of fees and expenses. For the returns of the Fund's other Series, please refer to the "Past Performance" section.

As the economic growth recovery continued through the period, valuations in the information technology and communication services sectors returned to (or near) 2021 highs.

The Fund slightly underperformed its benchmark for the period. An overweight exposure to the health care sector detracted most from the Fund's performance as more defensive sectors underperformed. The largest individual detractor from the Fund's performance was a position in Dollar General Corp. The company was impacted by a series of operational missteps combined with a deteriorating consumer environment, which drove its stock down more than 50%.

Stock selection within the health care sector contributed most to the Fund's performance, driven by positive returns from holdings in Eli Lilly and Co., Novo Nordisk AS and UnitedHealth Group Inc. Selection in the communication services sector also contributed most to the Fund's performance. Top individual contributors to the Fund's performance included holdings in Alphabet Inc. and Meta Platforms Inc. Alphabet Inc. benefited from a recovery in advertising revenue. Enthusiasm for Alphabet Inc.'s upcoming artificial intelligence products contributed further to its valuation recovery from 2022 lows. Meta Platforms Inc. benefited from the recovery in advertising revenues and the company's reduction in operating expenditures.

We added new positions in Eli Lilly and Co. and Novo Nordisk AS during the period and increased existing holdings in UnitedHealth Group Inc. and Humana Inc. A holding in Activision Blizzard Inc. was eliminated. The Fund holdings in Visa Inc. and Mastercard Inc. were trimmed.

RECENT DEVELOPMENTS

We remain concerned regarding the economic backdrop as the historically rapid rise in interest rates has yet to be felt. This, combined with volatility in the energy markets, is likely to strain consumer wallets and impact spending. We remained focused on quality growth and defensive business models, led by growth in sub-industries within the information technology and health care sectors, as these should provide resilience through a tough economic period while also providing opportunity for continued earnings growth.

⁽¹⁾ This information is derived from the Fund's semi-annual and annual financial statements.

(5) This information is provided for the period(s)/year(s) ended September 30, 2023 and March 31.

⁽²⁾ Management expense ratio is calculated based on expenses charged to the Fund (excluding commissions and other portfolio transaction costs) and is expressed as an annualized percentage of daily average net assets for the period/year, including the Fund's proportionate share of any underlying fund(s) expenses, if applicable. The Effective HST tax rate is calculated using the attribution percentage for each province based on shareholder residency and can be different from 13%.

⁽³⁾ The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average net assets during the period/year, including the Fund's proportionate share of such expenses of any underlying fund(s), if applicable.

⁽⁴⁾ The Fund's portfolio turnover rate indicates how actively the Fund's portfolio advisor manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the fiscal period/year. The higher a Fund's portfolio turnover rate in a period/year, the greater the trading costs payable by the Fund in the period/year, and the greater the chance of an investor receiving taxable capital gains in the period/year. There is not necessarily a relationship between a higher turnover rate and the performance of a Fund. Portfolio turnover rate is calculated by dividing the lesser of the cost of purchases and the proceeds of sales of portfolio securities for the period/year, and excluding cash and short-term investments maturing in less than one year, and before assets acquired from a merger, if applicable, by the average of the monthly fair value of investments during the period/year.

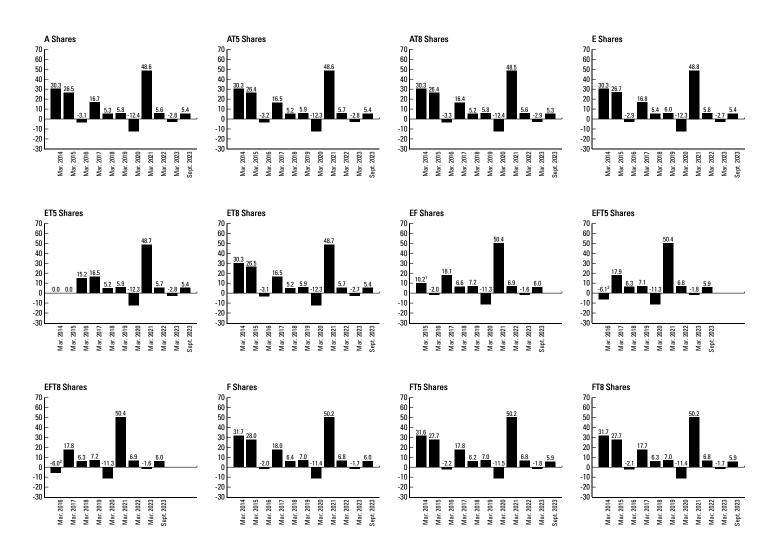

Management Report of Fund Performance for the period/year ended September 30, 2023
