## INVESTMENT OBJECTIVE AND STRATEGIES

The investment objective of the CI High Yield Bond Corporate Class (the Fund) is to obtain income and capital appreciation by investing, directly or indirectly, in high yield corporate bonds and other income producing securities throughout the world. Indirect investments can include derivatives and investments in other mutual funds.

The portfolio advisor will focus primarily on corporate bonds and debt obligations that are rated BBB or below by a recognized North American bond rating agency. The Fund may also invest in bank loans, convertible bonds, floating rate debt instruments, and private placements as permitted by securities regulations. In addition, the Fund may invest in emerging market bonds, exchange-traded funds, and closed-end funds.

The portfolio advisor uses techniques such as fundamental analysis to assess growth potential. This means evaluating the financial condition and management of a company, its industry and the overall economy. The portfolio advisor analyzes financial data, assesses the quality of management and conducts company interviews.

The Fund may use derivatives and short selling, but only as permitted by securities regulations. In order to earn additional income, the Fund may also enter into securities lending transactions, repurchase transactions and reverse repurchase transactions, to the extent permitted by securities regulations.

The Fund currently achieves its investment objective by investing all of its assets in CI High Yield Bond Fund (the Underlying Fund).

For a complete discussion of the Fund's and the Underlying Fund's respective investment objective and strategies, please refer to the Fund's and the Underlying Fund's most recently filed simplified prospectus.

## RISK

No changes affecting the overall level of risk associated with investing in the Fund were made during the period/year. The risks of the Fund remain as discussed in the Fund's most recently filed simplified prospectus or its amendments. The Manager reviews the risk rating for the Fund on an annual basis, at a minimum, based on the methodology mandated by the Canadian Securities Administrators to determine the risk level of the Fund. Any change to the risk rating made during the period/year was as a result of such review and was not a result of any change to the investment objective, strategies or management of the Fund.

## RESULTS OF OPERATIONS

The Fund's net assets increased by \$35.4 million to \$40.3 million from March 31, 2022 to March 31, 2023. The Fund had net sales of \$37.0 million during the year. The portfolio's performance decreased assets by \$1.5 million. The Fund paid distributions totalling \$0.1 million. Series A shares returned -5.0% after fees and expenses for the one-year period ended March 31, 2023. Over the same time period, the Fund's benchmark returned -3.6%. The benchmark is the ICE BofA U.S. High Yield Total Return Index (USD) (the Benchmark or the Index).

The performance of the Fund's other Series is substantially similar to that of Series A shares, except for differences in the structure of fees and expenses. For the returns of the Fund's other Series, please refer to the "Past Performance" section.

The following commentary pertains to the results of operations of the CI High Yield Bond Fund (the Underlying Fund).

A slowdown in economic growth that resulted from the removal of fiscal stimulus and tighter monetary policy was inevitable as central banks attempted to tame inflation. Negative year-over-year growth began to be priced into the market as central bank policy took an even more aggressive shift mid-2022 in the face of resilient inflation. As a result, origination activity slowed in response to higher U.S. Treasury yields, and high-yield bond spreads (a difference in yields) widened 103 basis points (bps) during the year. Combined with about a 100-bp increase in yields in the belly of the U.S. Treasury curve, yields increased about 150 bps. Restrictive monetary policy led to an increase in defaults but from a very low base. On a ratings basis, however, rising stars outnumbered fallen angels.

The Underlying Fund underperformed its benchmark for the year. A holding in Credit Suisse Group AG additional tier 1 notes was a significant detractor from the Underlying Fund's performance. The bank had initiated a comprehensive restructuring of its investment bank in the fourth quarter of 2022, the costs of which were offset by an equity capital raise. However, the fragile market and negative headlines in March 2023 precipitated rapid outflows to the point that the Swiss regulator deemed the bank non-viable and helped broker the acquisition of the bank by UBS Group AB. We marked down the Underlying Fund's position in Quotient Technology Inc. convertible bonds, which detracted from performance, in exchange for equity and warrants, as we restructured the company on a path toward profitability and sale.

---

Security selection contributed to the Underlying Fund's performance as did exposure to the U.S. dollar. The Underlying Fund's shorter duration (sensitivity to interest rates) positioning also contributed to performance. An American Airlines Group Inc. AAdvantage term loan due 2028 contributed positively to the Underlying Fund's performance. Collateralized by a loyalty program, this loan proved resilient in a rising interest rate environment. DCP Midstream Partners L.P. 5.85% hybrid bonds due 2043 contributed to the Underlying Fund's performance as the company's acquisition by Phillips 66 Co. meant that these bonds are likely to be redeemed in May 2023.

We added SNC-Lavalin Group Inc. 7.0% bonds due 2026 to the Underlying Fund as the company's credit quality seems to be set for improvement as overbudget, fixed-price turnkey projects roll off. Venture Global Calcasieu Pass LLC 3.875% bonds due 2029 were added to the Underlying Fund. The bonds are secured by a new-build liquefied natural gas export facility with contracted volumes that we believe can achieve investment-grade bond ratings. Bank of Montreal 7.373% institutional preferred shares were purchased as well. They have essentially the same structure as limited recourse capital notes but pay in dividends instead of interest.

Refinancing activity has been muted since the interest rate structure repriced higher. As a result, fewer bonds were called for early redemption than is typical in a 12-month period. Three bond positions in NGL Energy Partners LP were eliminated from the Underlying Fund as the company's operating results have been weak and pending maturities will have to be addressed with additional secured debt. Long-time Underlying Fund holding of HCA Healthcare Inc. 7.05% bonds due 2027 were finally upgraded to investment-grade bonds early in the year, and we took the valuation improvement to exit the Underlying Fund's position in the company.

Overall, the Fund underperformed its benchmark for the year.

## **RECENT DEVELOPMENTS**

Our chief concern is credit availability and the risk that the U.S. Federal Reserve Board focuses too long on inflation rather than growth. We expect a short and shallow recession in 2023, though this is not a certainty as financial conditions have now tightened to the point of fragility. Importantly though, the failure of some U.S. regional banks can be attributed to poor risk management rather than a function of bad assets.

Valuations have adjusted for the increase in downside risks. Prices are important as high-yield bonds are a short-duration asset class, so lower prices provide opportunities for careful credit analysis and can turn into price gains. In our opinion, credit quality (fundamentals) should prove resilient, while credit flow and issuance (technical factors) are favourable.

(1) This information is derived from the Fund's audited annual financial statements.

(2) Management expense ratio is calculated based on expenses charged to the Fund (excluding commissions and other portfolio transaction costs) and is expressed as an annualized percentage of daily average net assets for the period/year, including the Fund's proportionate share of any underlying fund(s) expenses, if applicable. The Effective HST tax rate is calculated using the attribution percentage for each province based on shareholder residency and can be different from 13%.

(3) The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average net assets during the period/year, including the Fund's proportionate share of such expenses of any underlying fund(s), if applicable.

(4) The Fund's portfolio turnover rate indicates how actively the Fund's portfolio advisor manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the fiscal period/year. The higher a Fund's portfolio turnover rate in a period/year, the greater the trading costs payable by the Fund in the period/year, and the greater the chance of an investor receiving taxable capital gains in the period/year. There is not necessarily a relationship between a higher turnover rate and the performance of a Fund. Portfolio turnover rate is calculated by dividing the lesser of the cost of purchases and the proceeds of sales of portfolio securities for the period/year, and excluding cash and short-term investments maturing in less than one year, and before assets acquired from a merger, if applicable, by the average of the monthly fair value of investments during the period/year.

(5) This information is provided for the period(s)/year(s) ended March 31.
