INVESTMENT OBJECTIVE AND STRATEGIES

The investment objective of the CI Money Market Fund (the Fund) is to earn income at the highest rate of return that is consistent with preserving capital and maintaining liquidity.

It invests primarily in money market instruments that mature in less than 365 days. These include:

- short-term debt obligations issued or guaranteed by the governments of Canada, any province or any agency of these governments
- commercial paper and other high quality short-term debt obligations of Canadian corporations and Canadian chartered banks.

The portfolio advisor selects securities that it believes have a fundamental value that is not reflected in their credit rating and yield.

The portfolio advisor may use techniques such as analyzing short-term interest rates and yield curves, the impact of economic trends on interest rates and economic growth, the credit rating of the issuer and financial data and other information sources.

The portfolio advisor may also choose to invest up to 5% of the Fund's assets in foreign securities.

For a complete discussion of the Fund's investment objective and strategies, please refer to the Fund's most recently filed simplified prospectus.

RISK

No changes affecting the overall level of risk associated with investing in the Fund were made during the period/year. The risks of the Fund remain as discussed in the Fund's most recently filed simplified prospectus or its amendments. The Manager reviews the risk rating for the Fund on an annual basis, at a minimum, based on the methodology mandated by the Canadian Securities Administrators to determine the risk level of the Fund. Any change to the risk rating made during the period/year was as a result of such review and was not a result of any change to the investment objective, strategies or management of the Fund.

RESULTS OF OPERATIONS

The Fund's net assets increased by \$198.4 million to \$885.4 million from March 31, 2022 to March 31, 2023. The Fund had net sales of \$198.5 million during the year. The portfolio's performance increased assets by \$21.2 million. The Fund paid distributions totalling \$21.3 million. Series A units returned 2.3% after fees and expenses for the one-year period ended March 31, 2023.

The performance of the Fund's other Series is substantially similar to that of Series A units, except for differences in the structure of fees and expenses. For the returns of the Fund's other Series, please refer to the "Past Performance" section.

The accommodative monetary policy that was put in place during the global COVID-19 pandemic fuelled a rise in inflation not seen in decades. Over the course of the year, the Bank of Canada (BoC) brought its overnight interest rate from 0.50% to 4.50% as central banks globally took aggressive actions to ease inflationary pressures. In March 2023, for the first time in a year, the BoC chose not to raise interest rates further and held its policy rate at 4.50% announcing that it expected to hold at this level conditional upon developments in the economic data.

An overweight exposure to high-quality, short-term corporate securities contributed to the Fund's performance, as did exposure to commercial debt. The top individual contributor to the Fund's performance was a holding in floating-rate notes (Jan. 31, 2025) issued by The Toronto-Dominion Bank. Floating-rate notes generated higher yields as the BoC increased its overnight rate from 0.50% to 4.50%.

The Fund's large cash position is maintained to meet regulatory requirements as well as the liquidity needs of the Fund. The Fund's cash allocation detracted from performance.

Increases and decreases to positions are made primarily as a result of cash management activities to address flows into and out of the Fund when they occur. Because of the short-term nature of the securities, positions are often eliminated as a result of maturities as they arise. Money market positions are not actively traded as they are of high quality and are often held to maturity absent significant outflows from the Fund. This limits turnover and transaction costs.

RECENT DEVELOPMENTS

Inflation in Canada slowed in January 2023, prompting the BoC to pause its interest rate hikes. The pause is conditional, allowing the BoC to see how the interest rate increases already implemented impact both inflation and the labour market. Canada's labour market remains strong, and recent unemployment numbers held steady at 5% in March 2023, which is very near a record historic low. The BoC noted that the low unemployment rate will have to rise before victory can be claimed in the battle against elevated inflation. Should the labour market continue to tighten, and strong gross domestic product growth persist, we expect the BoC, along with other central banks, to continue raising interest rates to alleviate inflationary pressures. As the slowing effects of higher interest rates are generally seen 12-18 months after a hiking cycle begins, we expect the data to show slowing economic growth going into the end of 2023 and the potential for a short, mild recession.
