### **RESULTS OF OPERATIONS**

The Fund's net assets decreased by \$6.0 million to \$533.0 million from March 31, 2023 to September 30, 2023. The Fund had net redemptions of \$30.3 million during the period. The portfolio's performance increased assets by \$30.5 million. The Fund paid distributions totalling \$6.2 million. Series A shares returned 5.3% after fees and expenses for the six-month period ended September 30, 2023. Over the same time period, the Fund's benchmark returned 5.7%. The benchmark is the S&P 500 Total Return Index (the Benchmark or the Index).

The performance of the Fund's other Series is substantially similar to that of Series A shares, except for differences in the structure of fees and expenses. For the returns of the Fund's other Series, please refer to the "Past Performance" section.

The following commentary pertains to the results of operations of the CI U.S. Equity Fund (the Underlying Fund).

Inflation declined during the period due to restrictive monetary policy and higher interest rates, as well as an easing of global supply chain pressures. Residential construction activity contracted amid higher mortgage rates, and there have been early signs of weakness within certain pockets of commercial real estate, such as office and retail. Unemployment remained at near-record lows, but there was upward pressure on wages and increased labour strikes. Inflation and higher interest rates in mortgages, autos and credit card debt dampened consumer spending on discretionary purchases.

The Underlying Fund slightly underperformed its benchmark for the period. Security selection in the industrials sector detracted from the Underlying Fund's performance, as did its allocation to the information technology sector. Holdings in Sensata Technologies Holding PLC and Atlanta Braves Holdings Inc. detracted from the Underlying Fund's performance. Sensata Technologies Holding PLC was negatively impacted by inflation in component and logistics costs and concerns that rising interest rates could reduce demand for new vehicles. Atlanta Braves Holdings Inc. recently completed its split from Liberty Media Corp. and underperformed because of higher player salaries and payments to Major League Baseball under its revenue-sharing plan, as well as increased variable stadium operating costs.

Stock selection in the communication services sector contributed to the Underlying Fund's performance, as did its allocation to the consumer staples sector. Top individual contributors to the Underlying Fund's performance included holdings in Alphabet Inc. and Meta Platforms Inc. Alphabet Inc.'s share price outperformed because the company rationalized excess headcount and costs accumulated over the past several years and benefited from investor optimism about the opportunity to integrate artificial intelligence within its search browser and other applications. Meta Platforms Inc. announced a rationalization in headcount and spending to develop its "Metaverse," which should support a recovery in profitability. The company also benefited from a stabilization in advertising demand and better user engagement with new features such as Reels.

We added a new position in Thermo Fisher Scientific Inc., a global life sciences conglomerate. The company is well positioned as an industry leader with resilient long-term growth prospects. An existing holding in Accenture PLC was increased as we believe the company is well positioned because of its leading scale, trusted reputation and wide breadth of services. We are also encouraged by healthy booking trends over the past several months and cost optimization efforts.

A position in Laboratory Corp. of America Holdings was eliminated from the Underlying Fund due to deteriorating demand for certain testing products, which we expect will continue. A position in LVMH Moet Hennessy Louis Vuitton SE was modestly trimmed because we are concerned that inflation and downward pressure on personal investment and real estate values could have a negative impact on luxury goods spending.

Overall, the Fund slightly underperformed its benchmark for the period.

#### RECENT DEVELOPMENTS

We expect elevated inflation to persist over the near term and thus favour businesses that have sustainable competitive advantages that allow them to exercise pricing power. Globally, central banks have raised interest rates aggressively to combat inflation. This has put pressure on the valuations of high-growth information technology companies and companies in cyclical sub-sectors, including housing, luxury goods and industrial components. While we do not position the Underlying Fund based on specific macroeconomic factors, we believe the recent valuation pullback has presented compelling opportunities to build positions in high-quality companies within these spaces.

Management Report of Fund Performance for the period/year ended September 30, 2023

In our opinion, the Russia-Ukraine conflict has reshaped the global energy supply chain. The North American energy sector has benefited from elevated pricing and is well-positioned to ramp up volumes to alleviate the shortage of crude oil and natural gas, especially in Europe. However, we remain cognizant of potential offsetting pressure from demand destruction and the economic slowdown induced by central banks to tame inflation.

Consumer budgets have been pressured by elevated inflation and deteriorating housing affordability. While we remain cautious, we expect consumer spending will be fairly resilient amid excess savings accumulated during the COVID-19 pandemic, record home equity and low unemployment. We expect spending to remain especially resilient in travel, entertainment and experiences, which consumers were unable to enjoy during the pandemic.

We continue to favour companies that can endure any economic environment as well as businesses with short-term challenges that are trading at prices well below our estimate of their intrinsic value. We continue to place an emphasis on balance sheet resilience and liquidity, which enables businesses to continue investing through an economic downturn and ultimately emerge stronger when conditions recover.

#### Management Fees

Approximately 26% of total management fees were used to pay for sales and trailing commissions. The remaining 74% of management fees were used to pay for investment management and other general administration.

#### Related Fund Trading

Related fund trading occurs when a Fund purchases or sells units/shares of another Fund managed by the Manager. During the period/year ended September 30, 2023, the Fund engaged in related fund trading or held position(s) in related fund(s) at the end of the period/year.

### Independent Review Committee

The Manager, in respect of the Fund, received the following standing instructions from the Independent Review Committee (IRC) with respect to related party transactions:

The applicable standing instructions require, amongst others, that related party transactions be conducted in accordance with the Manager's policies and procedures and applicable law and that the Manager reports related party transactions periodically to the IRC and advise the IRC of any material breach of such policies. The Manager's policies and procedures require that investment decisions in respect of related party transactions (a) are free from any influence by an entity related to the Manager and without taking into account any consideration relevant to an entity related to the Manager; (b) represent the business judgment of the Manager, uninfluenced by considerations other than the best interests of the Fund; (c) do not exceed the limitations of the applicable legislation; and (d) achieve a fair and reasonable result for the Fund.

Except as otherwise noted above under Related Party Transactions section, the Fund was not a party to any related party transactions during the period/year ended September 30, 2023. If the Fund invested in related party transactions, it relied on the IRC's standing instructions regarding related party transactions during this reporting period/year.

<sup>(1)</sup> This information is derived from the Fund's semi-annual and annual financial statements.

<sup>(2)</sup> Net assets per share and dividends per share are based on the actual number of shares outstanding for the relevant Series/Class at the relevant time. The increase (decrease) in net assets from operations per share is based on the weighted average number of shares outstanding for the relevant Series/Class over the fiscal period/year.

<sup>(3)</sup> Dividends are automatically reinvested in additional shares of the Fund.

<sup>(4)</sup> This information is provided for the period(s)/year(s) ended September 30, 2023 and March 31.

- (1) This information is derived from the Fund's semi-annual and annual financial statements.
- (2) Management expense ratio is calculated based on expenses charged to the Fund (excluding commissions and other portfolio transaction costs) and is expressed as an annualized percentage of daily average net assets for the period/year, including the Fund's proportionate share of any underlying fund(s) expenses, if applicable. The Effective HST tax rate is calculated using the attribution percentage for each province based on shareholder residency and can be different from 13%.
- (3) The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average net assets during the period/year, including the Fund's proportionate share of such expenses of any underlying fund(s), if applicable.
- (4) The Fund's portfolio turnover rate indicates how actively the Fund's portfolio advisor manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the fiscal period/year. The higher a Fund's portfolio turnover rate in a period/year, the greater the trading costs payable by the Fund in the period/year, and the greater the chance of an investor receiving taxable capital gains in the period/year. There is not necessarily a relationship between a higher turnover rate and the performance of a Fund. Portfolio turnover rate is calculated by dividing the lesser of the cost of purchases and the proceeds of sales of portfolio securities for the period/year, and excluding cash and short-term investments maturing in less than one year, and before assets acquired from a merger, if applicable, by the average of the monthly fair value of investments during the period/year.
- (5) This information is provided for the period(s)/year(s) ended September 30, 2023 and March 31.

### PAST PERFORMANCE

This section describes how the Fund has performed in the past. Remember, past returns do not indicate how the Fund will perform in the future. The information shown assumes that dividends made by the Fund in the period(s)/year(s) shown were reinvested in additional shares of the Fund or relevant Series/Classes of the Fund, as applicable. In addition, the information does not take into account sales, redemption, distribution or other optional charges that would have reduced returns or performance.

#### Year-by-Year Returns

The following chart/charts shows/show the Fund's semi-annual and annual performance for each of the period(s)/year(s) shown and illustrates/illustrate how the Fund's performance has changed from period/year to period/year. In percentage terms, the chart/charts shows/show how much an investment made on the first day of each financial period/year would have grown or decreased by the last day of each financial period/year, except where noted.

- 1 2023 return is for the period from April 08, 2022 to March 31, 2023.
- 2 2019 return is for the period from January 30, 2019 to March 31, 2019.
- 3 2015 return is for the period from March 25, 2015 to March 31, 2015.
- 4 2020 return is for the period from September 27, 2019 to March 31, 2020.
