The Path to Wellness
Assante Wealth Management is a leading provider of integrated wealth management solutions, with a network of professional advisors located in communities throughout Canada. As an Assante client, you can feel secure knowing that we are helping you to build and preserve your financial future. And now, we are pleased to offer you expert health care counsel – through The Path to Wellness, a health care concierge program for Assante clients.
THE PATH TO WELLNESS

“Be well-advised” is our promise to each client. This means receiving expert advice and comprehensive wealth management solutions tailored to your unique needs and goals.

Through our special partnership with the Medcan Clinic, we are broadening our commitment to you by putting you in touch with expert advice regarding your health. It’s just another way that we are striving to keep you well-advised.

With The Path to Wellness, Medcan will provide you with a complete analysis of your current state of health through its Comprehensive Health Assessment, which is designed to give you the data and guidance you need to proactively manage your health and well-being.

In today’s complex world, take comfort in knowing that your financial needs are being looked after by an Assante advisor – and that through The Path to Wellness you can be on your way to taking control of your health for a longer and healthier life.

MEDCAN CLINIC – KEEPING BUSY PEOPLE HEALTHY

Medcan is Canada’s leader in preventive care services dedicated to keeping busy people healthy by providing comprehensive, high-quality care to executive teams and individuals who are interested in actively managing their health.
WHY HAVE A COMPREHENSIVE HEALTH ASSESSMENT?

The Comprehensive Health Assessment focuses on identifying health risks before signs and symptoms occur, using the best available testing to screen for risk of cancer, heart disease, diabetes, and an array of other illnesses – all at a time and place that is convenient for you.

The Comprehensive Health Assessment is completed in just one session and includes tests that would take days, or even months, to complete if your family doctor was to refer you to other physicians or locations.

Your Comprehensive Health Assessment will include:
- a thorough set of in-house testing
- immediate interpretation
- a review of your test results with a physician
- a report detailing the outcome of your medical specialist coordination following the assessment if necessary.

If you choose to profile your health with an annual Comprehensive Health Assessment, Medcan is able to track your progress over time and give you important insight to help you better manage your health and well-being in the long run.

If you choose to profile your health with an annual Comprehensive Health Assessment, Medcan is able to track your progress over time and give you important insight to help you better manage your health and well-being in the long run.

Some tests are performed only on an as-required basis. The Medcan Clinic strives to use the best technology and tested protocols to detect disease based on the current state of diagnostic medicine and to minimize the risk of developing disease. The Comprehensive Health Assessment is an uninsured service and is not covered through the provincial health care system.
