Standard Deviation calculated on Series I

Standard deviation: A measure of risk in terms of the volatility of returns. It represents the historical level of volatility in returns over set periods. A lower standard deviation means the returns have historically been less volatile and vice-versa. Historical volatility may not be indicative of future volatility.

Important Disclaimers

ivari CI Portfolios are available as Guaranteed Investment Portfolios within select ivari segregated funds contracts and as Managed Portfolio Index Interest Options within select ivari Universal Life Products.

Segregated Fund Net Returns (listed under the “Portfolio Performance” section) are for the ivari Guaranteed Investment Funds product (imaxxGIF-75/100). Returns are after the management expense ratio (MER) has been deducted. The MER includes the management fee, the insurance cost for segregated fund guarantees, operating expenses and the applicable taxes of the fund. Policyholders do not pay for these expenses directly. The MER reduces the return of the investment. The Manager, at its discretion, may waive or absorb a portion of the operating expenses otherwise payable by a Fund class. These waivers may be terminated at any time by the Manager. MER and MER before waiver can be found in the ivari Segregated Fund Financial Statement under the section “Financial Highlights.” For details please refer to the Information Folder and contract, and to www.ivari.ca for the returns on other products.

Any amount that is allocated to a segregated fund is invested at the risk of the contract holder(s) and may increase or decrease in value. Past results should not be construed as indicative of future performance. Actual fund performance is expected to vary.

Returns for index interest options are linked to the performance of the designated index. When you invest in an index interest option, you do not acquire an interest in the designated index or purchase any units or legal interest in any security.

The comparisons presented are intended to illustrate the segregated fund’s historical performance as compared with the historical performance of widely quoted market indices or a weighted blend of widely quoted market indices or another investment fund. There are various important differences that may exist between the segregated fund and the stated indices or investment fund, which may affect the performance of each. The objectives and strategies of the segregated fund result in holdings that do not necessarily reflect the constituents of and their weights within the comparable indices or investment fund. All indexes quoted in this document are reported on a total return basis, which assumes the reinvestment of all dividends and other cash distributions. Some indices (e.g.: MSCI EAFE Index) referenced in the included portfolio commentary may not be components of the portfolio benchmarks.

Individuals should seek the advice of professionals, as appropriate, regarding any particular investment. Investors should consult their professional advisors prior to implementing any changes to their investment strategies. These investments may not be suitable to the circumstances of an investor. Some conditions apply.

Commissions, trailing commissions, management fees and expenses all may be associated with mutual fund and exchange-traded fund (ETF) investments. Please read the prospectus before investing. The indicated rates of return are the historical annual compound total returns net of fees and expenses payable by the fund (except for figures of one year or less, which are simple total returns) including changes in security value and reinvestment of all distributions and do not take into account sales, redemption, distribution or optional charges or income taxes payable by any securityholder that would have reduced returns. Mutual funds and ETFs are not guaranteed, their values change frequently, and past performance may not be repeated. You will usually pay brokerage fees to your dealer if you purchase or sell units of an ETF on recognized Canadian exchanges. If the units are purchased or sold on these Canadian exchanges, investors may pay more than the current net asset value when buying units of the ETF and may receive less than the current net asset value when selling them.

The CI Exchange-Traded Funds (ETFs) are managed by CI Global Asset Management, a subsidiary of CI Financial Corp. (TSX: CIX, NYSE: CIXX).
