Inception Date: July 4, 2016

PORTFOLIO COMMENTARY

Global financial markets were mixed during the quarter. Equity market leadership continued to narrow around the U.S., in contrast to international markets that broadly ended lower. Investors turned to rising trade tensions and concerns that global economic activity had peaked, which weighed on sentiment. The portfolio performed well in this environment, ending the period higher and outperforming its benchmark. Performance was driven by security selection overall and positive contributions from holdings in the consumer and materials sectors.

Within the consumer sector, the portfolio's holding in Walgreens performed well during the quarter as shares rose about 21%. The shares rebounded from a difficult second quarter as investors began to recognize the value in the business. Alimentation Couche-Tard also performed well as shares rose 13% during the quarter. The company recorded its best same-store sales growth in at least seven years, attributed partially to a newly created Chief Marketing Officer position and a push into other fast-growing categories. The combination of successfully integrating recent acquisitions and stronger organic growth has supported fundamentals.

Materials holdings in Ball Corporation and Crown Holdings also performed well. Both companies generate strong cash flows while operating in the packaging industry, providing steel and aluminum cans for food, beverage and household products. Ball saw its shares rise as the integration of a recent transaction seems to be progressing well. Crown Holdings performed well after reporting strong results that demonstrated healthy volume growth and good cash flow generation. It did, however, reduce full year guidance as a result of the strong U.S. dollar as well as rising freight costs tied to tight transportation markets and higher fuel costs.

One of the largest detractors within the portfolio included materials holding Franco-Nevada. Franco-Nevada was negatively impacted by uncertainty around the continued development of the Cobre Panama project. If the project were to be suspended permanently it would be a blow to the company's future royalty stream earnings. The shares ended the quarter down about 16%.
